Discover unique treatment options

Are you seeking a viable alternative in treating mild to moderate OSA in patients who intractably refuse CPAP and/or MAS devices because they are obtrusive, uncomfortable and unattractive? The DNA Appliance system created by Dr. David Singh is a breakthrough in the treatment of craniofacial enhancement

Dr. Martha Cortés, DDS, New York, is a general and cosmetic dentist, as well as one of the few fully certified neuromuscular dentists from the prestigious Las Vegas Institute, Las Vegas, Nevada. Dr. Cortes is also a certified provider and instructor of the DNA Appliance™, a functional system for treating TMJ.

of Dr. Cortes at (212) 262-0950 or by
email at lazersmile@aol.com

Treating Obstructive Sleep Apnea with the DNA Appliance™ System

Unlike MAS devices that temporarily create more airspace by advancing the mandible forward and locking it into place with screws, elastic straps, fins, etc. (and which some patients find claustrophobic and frightening), the DNA Appliance alters the size of the oral cavity permanently, thus providing an ample increase in airway dimension. The DNA appliance is a non-intrusive and comfortable device that is worn evenings and nights, and can be fitted with an extension loop that holds the soft tissue in place when sleeping. The seminars are offered year round, beginning with Level II certification, Level III case management and Level IV, which involves the treatment of OSA and other craniomandibular issues, Dr. Cortes will introduce her unique approach to the DNA appliance as a Fellow of the Las Vegas Institute for Advanced Dental Studies, and as a Fellow and Master of the International College of Craniomandibular Orthopedics.
